BATTERY RANGE

ALTUNA launches a new range of
wireless battery-powered tools

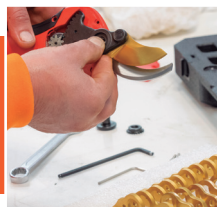

EFFICIENCY · DURABILITY · STRENGTH · LESS EFFORT

EFFICIENCY: With ALTUNA's new GOLD TITANIUM coating, 60% in cutting efficiency is achieved.

DURABILITY: Thanks to ALTUNA's GOLD TITANIUM treatment, the blade becomes more long-lasting and resistant by sealing the porosity of the metal.

STRENGTH: The new battery technology with ALTUNA's new lithium battery packs provides high power and durability to our range of battery-powered tools.

LESS EFFORT: ALTUNA's wireless battery-powered tools make the work experience simple and pleasant.

ALTUNA, in its 100th Anniversary, presents the new TINITA treatment (known as Titanium Nitride). Its properties are well known in the sector, having our shears the most remarkable ones.
