EXTEND THE LIFE OF YOUR TOOLS

SPECIALISED TECHNICAL SUPPORT / PROFESSIONAL SERVICE / REPAIR UNDER WARRANTY

At ALTUNA, we understand how important it is to have tools in perfect condition season after season. That's why we offer a maintenance and repair service carried out by qualified technicians using only original spare parts.

We have a network of centres equipped with our own technical service, staffed by specialists in repairs, as well as remote assistance at any point across the territory.

Proper maintenance extends the service life of your tools and significantly reduces long-term costs.

CARE FOR YOUR TOOLS
EXTEND THEIR LIFE

Fluid lithium grease, resin cleaner, and oily dielectric anti-rust product help keep your battery-powered pruning tools protected, clean, and always ready to perform at their best.

Note: The tips come in a box.

Note:
The tips
come in a box.

GL1
FLUID LITHIUM GREASE 400 ml

6

8 413491 022567

Product composed of high-quality soap-based greases, with multiple applications, suitable for manual and battery-powered shears. Very chemically stable and water-repellent. Resistant in salty and dusty environments. Ideal for lubricating bearings, joints, bolts, blades, and users of various electric or manual pruning shears. Cleaning with Ref. ER2 is recommended for better lubrication.

ER2
RESIN AND DIRT REMOVER FOR PRUNING SHEARS 400 ML

6

8 413491 022574

Quickly eliminates all types of resins and dirt. Very practical for the maintenance and cleaning of manual and electric pruning shears. It is recommended to follow up with our product “GL1 Fluid Lithium Grease”.

AD3
DIELECTRIC OILY ANTI-OXIDANT 400ml

6

8 413491 022666

Specific product that leaves a greasy film to protect electrical equipment and electrical contacts from oxidation. It prevents and eliminates the formation of residues and impurities that hinder the proper functioning of the equipment. It has excellent degreasing power, promotes conductivity, and is water-repellent. Do not use with the equipment switched on.

PROFESSIONAL PRUNING SAWS

JAPANESE TEETH
SPEED AND DURABILITY

Blades with Japanese teeth and induction-hardened teeth that provide greater wear resistance.

ULTRAFAST LINE

EXTRACTION NOTCH

With sawdust extraction, CUTTING is ACCELERATED and EASED, achieving greater cooling of the blade.

HOLLOW GROUNDED BLADE
MORE DURABILITY

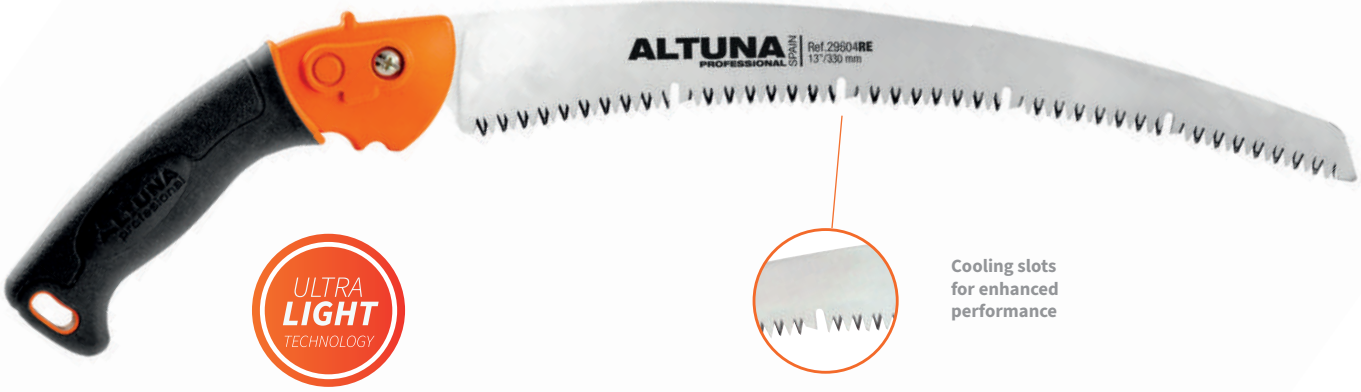

New symmetry in the blade with grinding that reduces friction and extends the service life of the pruning saw.

QUALITY AND PERFORMANCE

ERGONOMIC HANDLES
BETTER GRIP

Handles with ergonomic design, allowing the wrist to remain in a straight line, which increases the area of force application and reduces fatigue.

29604RE240MA / 29604RE270MA / 29604RE330MA

ULTRA LIGHT TECHNOLOGY

THE PERFECT POLE FOR CUTTING HIGHER, WITH GREATER PRECISION AND LESS EFFORT.

New **ALTUNA** pole pruners, designed to meet the needs of **professionals and advanced** users. They feature **ultra-lightweight**, **more resistant tubes, a renewed fixing system that is more compact and anti-vibration, and non-slip rubberised handle**s for a comfortable and secure grip.

Available in **different heights**, they integrate our **blades with extraction** groove technology, which makes cutting easier and improves performance in every job.

They **also include a rigid cover** for easier transport and greater safety.
